RE: Incorporation of Construction Permits into Existing Title V Operating
Permits Under Operational Flexibility [Section 502(b)(10)]

Dear Sir or Madam:

The incorporation of construction permits into issued Title V permits differs from the process followed by the existing state operating program.

The project covered by the enclosed construction permit(s) has been identified by our permitting staff as requiring updating your facility's Title V permit under operational flexibility. Please use the draft letter on the reverse to prepare your request for updating your operating permit. This letter will also satisfy the requirements of S.C. Regulation 62.1, § II.B.1 and must be submitted to the Department at least fifteen days prior to placing the new or modified unit(s) into operation.

If you have any questions on this procedure or what to submit please contact the permitting staff member listed on the cover page of the attached construction permit(s.)

Sincerely,

Robert J. Brown, Jr., Assistant Director
Engineering Services Division
Bureau of Air Quality

Title V Operational Flexibility Notifications

TO: Engineering Services Division, Bureau of Air Quality Control
South Carolina Department of Health and Environmental Control
2600 Bull Street
Columbia, South Carolina 29201

TO: U.S. EPA Region 4, APTMD
Operating Source Section
61 Forsyth Street, SW, Atlanta, GA 30303

Re: Permit number **0000-0000**, Reference **County - Company - emission point**

The facility plans to make the following change on **(anticipated date of change)** pursuant to South Carolina Regulation 61-62.70.7(e)(5):

1. **Brief description of the change**
2. **Change in actual emissions as a result of the change**
3. **Any permit term or condition that is no longer applicable as a result of the change**

This change does not exceed the allowable emission rate for **(regulated pollutants affected by the change)** and does not constitute a title I modification. This change does not violate applicable requirements or contravene federally enforceable permit terms or conditions that are monitoring (including test methods), recordkeeping, reporting or compliance certification requirements.

Based on information and belief formed after reasonable inquiry, the statements and information in this document are true, accurate, and complete.

Sincerely,

Responsible official for title V

PLEASE NOTE THAT ALL THE BOLD AND UNDERLINED VARIABLES IN THE CERTIFICATION ABOVE ARE TO BE FILLED IN BY THE TITLE V SOURCE.

[If this notification is to be provided to the permitting authority (and the EPA) in response to a construction permit then it must be submitted at least fifteen days in advance of the proposed change. If no new construction permit has been issued, then at least seven days in advance.]
